## EDUCATION & EXPERIENCE

### **Turing School of Software & Design**

Back End Development

July 2017 - May 2018

### **Borough of Manhattan Comm. College**

AA Liberal Arts

June 2018 - December 2019

### **United States Army**

M1 Abrams Crewmember

August 2010 - December 2013

## OBJECTIVE

I am a tinkerer who left the military to pursue a career in software development. I love to learn about new technologies and I have experience delivering results and developing strong work relationships in a collaborative environment.

## CORE COMPETENCIES

Ruby  
JavaScript ES6  
Ruby on Rails  
Sinatra  
Node.js  
jQuery  
Express  
Vue.js  
PostgreSQL  
Relational Databases  
ActiveRecord  
REST API  
RSpec / Minitest / Jest  
Travis CI  
Git / Github  
AWS S3  
Jekyll  
HTML5  
CSS3  
Bootstrap  
CSS Grid / Flexbox  
Agile  
Jira / Pivotal Tracker / Trello  
Heroku

## PROJECTS

Projects : [www.youngjoonjung.com](http://www.youngjoonjung.com)

### **Adop Shop**

- developed a mock eCommerce site in a group using Agile development practices and Git version control
- Integrated Admin/User roles, Cart sessions, and Authorization & Authentication of users
- Designed RESTful backend server and also incorporated AWS S3
- Utilized : Ruby on Rails, AWS S3, PostgreSQL, Bootstrap 4, Heroku, Rspec

### **Reading List**

- RoR full-stack application with a PostgreSQL database
- Authorization/Authentication of user
- Consumes New York Times API and allows a User to easily save articles
- Utilized : Ruby on Rails, PostgreSQL, Bootstrap 4, Heroku, NYT API, Rspec

### **Rales Engine**

- Rails API built in a paired programming environment
- JSON
- Utilized : Ruby on Rails API, JSON, RSpec, PostgreSQL
