ABOUT ME

I am a problem solving, result-driven software developer with an enthusiasm for learning.   In my past experiences in the military and in my software education at Turing, I have learned to deliver results under pressure with a collaborative approach on teams of all types. I am proficient at writing clean, well-tested, and reusable code using OOP principles.

EDUCATION

Turing School of Software & Design
Back End Development
July 2017 - May 2018

Borough of Manhattan Comm. College
